

Jones Eye Clinic COVID 19 Schedule Update

Updated March 19, 2020

At Jones Eye Clinic our priority has always been to provide exceptional patient care in a safe environment.

Due to increased concerns over the COVID-19 virus pandemic we are suspending all non-urgent clinic visits and all elective surgical procedures effective **March 23rd through April 6th, 2020, or until otherwise determined.**

Recent recommendations by the American Academy of Ophthalmology, the American Medical Association, and the American College of Surgeons encourage doctors to delay non-urgent clinic visits and elective surgical procedures to ease any burden it may place on the health care system and to conserve supplies which may be needed if the COVID 19 infection rates rapidly increase. Jones Eye Clinic supports this request and the collective effort to fight this emerging threat to the health and safety of all Americans.

You will be contacted individually by phone if you have an upcoming clinic appointment or planned surgery impacted during March 23rd through April 3rd. We continue to be available to assist you and provide care as needed for patients with urgent needs.

We continue to assess the situation daily and actively follow updates from the Centers of Disease Control (CDC) and guidelines from our federal, state and local government agencies. We will keep you updated.

Please contact us with any questions or concerns.
